Interdisciplinary Studies

THE DEVONIAN BOTANIC GARDEN

Drive west on highway 16 to the Devon turnoff. Then, drive south for nine miles on highway 60 and look for large green signs: they will direct you to the University of Alberta Devonian Botanic Garden.

Why should a member of Interdisciplinary Studies be located so far from the University? Patrick Seymour, Director of the Garden, explains that it is situated on the remains of glacial Lake Edmonton, that is, on a composite of aeolian sand dunes and peat sloughs. The landscaped areas are on a mixture of peat and sand. This combination makes for excellent growing conditions.

But why a University Garden? One basic aim is to broaden the range of plant materials that will grow in the Edmonton region. Hence, in 1959, H.A. Dyde, Q.C., an alumnus of this University, donated land for this purpose. However, the attempt to establish the project met with disaster in 1974; a flood in the Parkland County area destroyed most of the plants. "A blessing in disguise," says Mr. Seymour. Friends of the Botanic Garden, a non-profit organization supporting the work and development of the Garden, was able to get a grant of \$375,000 from the Devonian Foundation to repair the damage, develop new gardens, build headquarters and greenhouses. Happily, the grant was matched by the Department of Advanced Education and Manpower.

The alpine garden was the first major project. It is furnished with alpine plants from Europe, Asia, New Zealand, and South and North America. Alpine plants were the logical choice. The Garden has good snow cover and an altitude to accommodate those plants from around the world which grow in similar conditions. Their "winter hardiness" is tested with the hope that some of them will grow successfully here and thereby broaden the range of plant materials which will grow in the Edmonton Region. One success is the blue poppy indigenous to the Himalayas. It has almost become the Garden's symbol.

An unusual collection, and one that Mr. Seymour is rather proud of, is the Nineteenth Century Shrub Rose Garden. It has thirty

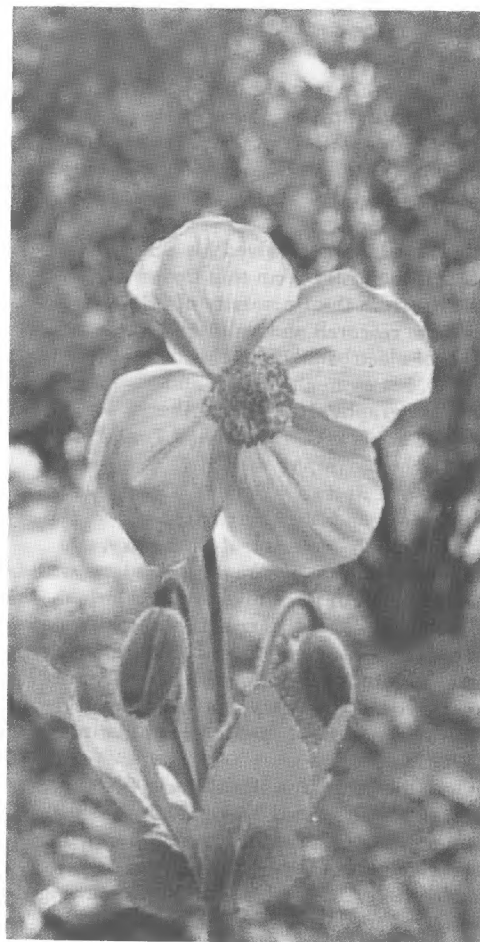

varieties altogether and each is noted for its heady scent. The roses were purchased from New Zealand in June of 1976 and were out of the ground for only one week. They bloomed well in 1976 and ninety-five percent of them survived the winter.

An herb garden is now in the design stage, but the results will be most interesting. It will contain culinary, medicinal, poisonous, and dye herbs. And herbs illustrating the mediaeval doctrine of signatures: a physician of that period believed that if a plant, or part of a plant, resembled a part of the body, it could be used to cure that part were it diseased. Liverwort, for example, was used in the treatment of diseases of the liver because its shape was similar to that organ.

The Devonian Garden is also planning a display of plants used by native peoples. Funded by the Imperial Oil Company, it will show what was used by them for cooking and medicinal purposes. It is hoped that this project will be completed in 1978. In addition, plants indigenous to this province—from the prairie regions to the mountains—are being gathered to form a labelled collection where visitors can learn to identify the flora of Alberta. It is expected that there will be approximately four thousand specimens.

Future objectives of the Garden are varied. It hopes to provide outdoor laboratory space for university and high-school students, to take an active part in the proposed National Botanic Garden System for Canada as well as the National Gene Pool Conservation Programme. To this extent, the Garden is already maintaining a historic collection of four hundred varieties of *Gladiolus*, known as the Kilduff Collection.

The Garden considers public relations as an important and integral part of its work. The Friends of the Devonian Botanic Garden, founded in 1971, encourages public interest in and support of many projects. The Friends, in turn, receive the news magazine "Kinnikinnik" containing reports on hardiness trials and horticultural information, enjoy winter meetings with guest speakers and slide presentations, and receive free seed of rare or unusual plants. Certain members of the Friends have organized a Botanic Garden Club to develop fund-raising projects including sales of dried bouquet materials, arrangements, post

cards, and note paper.

A visit to the Devonian Botanic Garden is a refreshing experience. But, it should be remembered that it is not a park. It is a facility for the study and appreciation of plants. Visitors are asked to supervise small children and to ensure that no plant or other material is disturbed. And, no pets are allowed. The Garden will be open during the following hours this summer: Saturday, Sunday, and public holidays, 1 p.m. to 6 p.m.; and during June, July, and August, Monday to Friday from 3 p.m. to 9 p.m.

ROYAL SOCIETY HONORS PROFESSORS

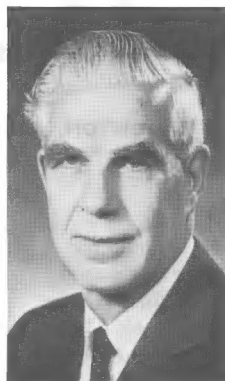

The Royal Society of Canada, at its Annual Meeting held in Fredericton in early June, honored two University of Alberta professors. Walter Harris, Professor and Chairman of the Department of Chemistry, was elected to Fellowship in the Royal Society for his work in analytical chemistry. R.E. Folinsbee, Professor of Geology, was elected President of the Society.

Dr. Folinsbee was elected to Fellowship in the Society in 1956 and over the years has served it in a variety of ways. He has been a member of the Council, and in 1970 he was President of the Academy of Sciences of the Royal Society.

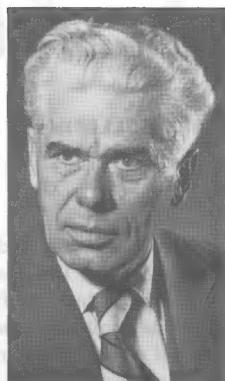

Dr. Harris, who received his BSc and his MSc in Chemistry from this University and his PhD from the University of Minnesota, has done research and published in the fields of electroanalytical chemistry, synthetic rubber, hot atom chemistry, and chromatography. He has coauthored a number of books: *Programmed Temperature Gas Chromatography* with H.W. Habgood of the Alberta Research Council, *Chemical Separations and Measurements* with B. Kratochvil, Professor of Chemistry, and the second edition of *Chemical Analysis* with H.A. Laitinen of the University of Florida. In recent years, Dr. Harris has been awarded the Outstanding Achievement Award of the University of Minnesota, the Fisher Award in Analytical Chemistry, and the Chemical Education Award of the Chemical Institute of Canada.

Over the years, the Royal Society has been changing gradually, Dr. Folinsbee feels, from a group of three Academies primarily concerned with electing distinguished scholars to its fellowship and with awarding prizes and medals for excellence in learning and research in the arts and sciences to a group with broader concerns in issues of more immediate importance to society.

In 1970 when Dr. Folinsbee was elected President of the Academy of the Sciences, he warned in his presidential address that the mid-seventies would see an energy crisis. This year's Society Symposium, which was organized by Dr. Folinsbee, who was Program Chairman for the Annual Meeting, dealt with "Shifts in the balance of Canada's resource endowments." (Three of the speakers were connected either directly or

indirectly with this University: Fred Bentley, Professor of Soil Science, spoke on resource endowments and agricultural change, George Govier, former Dean of Engineering, delivered a speech on the fossil fuel resources of the western provinces, and Cal Evans, a graduate in Geology and Physics and now Exploration Manager for Imperial Oil, spoke on the need for Canada to develop the oil and gas resources of the Arctic.) The Society's interest in, and concern for, issues of national and international importance is an indication of its increasing sense of responsibility and involvement.

VISITORS

■ R. Raghavan of Simon Fraser University gave a lecture on "Bicritical spin dynamics and the renormalization group: a two time scale problem" to the Theoretical Physics Institute on 8 June. R. Rockmore of Rutgers University delivered a lecture on "The π -D scattering length" to the Institute on 15 June.

PEOPLE

■ Bruce Bain, Associate Professor of Educational Psychology, and Agnes Yu, Graduate Student in Educational Psychology, have a paper entitled "Toward an integration of Piaget and Vygotsky: cross-cultural replication concerning cognitive consequences of bilinguality" in *The Fourth Linguistic Association of Canada and United States Forum*. Dr. Bain also recently presented a paper at the 1977 Annual Meeting of the Hong Kong Psychology Association; the paper was entitled "A cross-cultural model of language and cognition." At the Universities Service Centre of Hong Kong, Dr. Bain also gave a public address on "The political climate in Canada today."

■ Heather Horch, Library Clerk at Cameron Library, will be a member of Greater Europe Mission's summer music team, which is travelling to France. The team, which will be headquartered at the European Bible Institute near Paris, is scheduled to give a series of concerts throughout France. Greater Europe Mission is a non-denominational missionary agency that operates nine Bible institutes and a theological seminary, establishes churches, and engages in evangelism in thirteen European countries.

■ Milan V. Dimic, Professor of Comparative Literature, presented a paper entitled "Vuk Karadzic's collection of erotic folk songs" on 14 May at this year's annual meeting of the Canadian Association of Slavists in Fredericton.

NOTICES

BRETON PLOTS FIELD DAY

A Field Day is being sponsored by the Departments of Soil Science and Agriculture at the Breton plots located about seventy miles south-west of Edmonton. The plots, composed of sulphur-deficient Gray Luvisolic soils, have been in operation since 1930 and show the effects of fertilizers and crop rotations on soil productivity.

The theme of the Field Day is "Soil and fertilizer nitrogen." Among the topics to be discussed are "Nitrogen fertilizers available in Alberta, their characteristics, advantages, and disadvantages," "Other sources of nitrogen available to the farmer: manure, legumes, other possibilities," and "Time of application of nitrogen fertilizers for annual crops: results of some current studies." There will be tours of the plots including the long-term experiment and some new ones. In case of inclement weather the field trip will be replaced by the film *Making the Most of a Miracle* and a resumé of the findings of the Breton plots. The program begins at 1 p.m.

FAMILY LIFE SEMINARS

There will be a seminar on love, marriage, and sex every first Tuesday of the months of July, August, and September at 7 p.m. in the KIVA Room, N2-103 Education North. For more information contact D. Sawak Sarju at 436-0885 or 352-7096.

SUMMER SESSION FILM SERIES

The University's Chaplains' film series this summer will bear the theme "the quiet violence of society." Some questions which the film series hopes to explore include: "Does society have too little toleration for creative dissent and disorder?" "Do some

groups or individuals in society have undue influence and power over other people?" "How do people cope with the oppression or suppression they experience in their lives?" "How do persons trapped in dehumanizing situations preserve their humanity?"

Films being shown are *Catch 22* (7 July, Thursday), *Wedding in White* (11 July, Monday), *Citizen Kane* (18 July, Monday), *A Day in the Death of Joe Egg* (25 July, Monday), and *Jesus Christ Super Star* (2 August, Tuesday). All showings will begin at 7:30 p.m. in TL-11, Tory Building. Each film will be followed by a discussion.

Series membership is \$5 and may be obtained in 158 Students' Union Building.

"COMMITMENTS" WINS AWARD

The Department of Radio and Television has received an Award of Merit from the Association for Media and Technology in Education (AMTEC) for its film

"Commitments". "Commitments" is a documentary about two families with Down's syndrome children who have received help from a program for the very young retarded child created by Gerry Kysela, Associate Professor of Educational Psychology. It was produced and directed by Brian Kienapple of the Department of Radio and Television and was broadcast earlier this year on CFRN's *Midweek*.

The Award was given at the AMTEC Media Festival in early June. Of forty-seven entries in the video-tape category at the Festival, thirteen received Awards of Merit and four Awards of Excellence. AMTEC is a national organization that includes in its membership school boards, universities and colleges, and educational media such as ACCESS and TVOntario.

RESEARCH GRANTS

Granting Agencies: Application Deadlines

This list of deadline dates for submissions to granting agencies for research funds, exchange programs, and travel grants is published every month in *Folio*. In order to allow sufficient time for processing, all applications should reach the Research Grants and Contracts Office at least ten days before the deadline date. Where other University resources are involved, the time requirement may be longer than ten days and such applications should therefore be submitted well in advance. An extra copy of the application should be provided for the Research Grants and Contracts Office.

Further information may be obtained by consulting the *Calendar of Granting Agencies for Research Funds, Exchange Programs, and Travel Grants*, which is available in the offices of deans, directors of institutes, centres, and schools and department chairmen, or by telephoning the Research Grants and Contracts Office, 432-5360. Note: Although the Calendar is updated on a continuous basis, the following information could be subject to change without notice. If staff members have advanced information on forthcoming changes, the Research Grants and Contracts Office would appreciate being advised. Code: (R) Research funds; (E) Exchange programs; (T) Travel grants.

SURPLUS EQUIPMENT LISTING

The equipment listed below has been declared surplus. If your department is interested in any of this surplus equipment, please get in touch with the declaring department and arrange a satisfactory price. Once you have arrived at a price, make up a purchase requisition showing the account to be charged and forward the requisition to the Purchasing Department.

All departments are encouraged to dispose of surplus equipment. This disposal is accomplished by completing a surplus equipment declaration form and forwarding it to the Purchasing Department. Proceeds from such disposals are normally credited to the accounts from which the equipment was originally purchased; however, this is not always the case. For further information and details on the disposal of surplus equipment, telephone Bonnie O'Dwyer or Roy Bennett at 432-3208.
